## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 1\_Q6

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Joey is learning about bitwise operations and is working on a project that involves extracting specific bits from integers. He needs to write a program that takes an integer and the number of bits N as input and outputs the value of the lowest N bits of the integer.

Help Joey in his project to understand and visualize how bitwise operations work in practical scenarios.

##### *Input Format*

The first line of input consists of an integer X, representing the given integer.

The second line consists of an integer N, representing the number of bits to extract.

### ***Output Format***

The output displays "Result: " followed by an integer representing the value of the lowest N bits of the given integer.

Refer to the sample output for formatting specifications.

### ***Sample Test Case***

Input: 85  
2

Output: Result: 1

### ***Answer***

```
// You are using Java
import java.util.*;
class Main
{
    public static void main(String args[])
    {
        Scanner in = new Scanner (System.in);
        int a = in.nextInt();
        int b = in.nextInt();
        int bit = (1<<b)-1;
        int d = a&bit;
        System.out.println("Result: "+d);
    }
}
```

**Status : Correct**

**Marks : 10/10**
